Subjects were largely dissatisfied with their experiences with traditional healers, but healing is still an incredibly common first-line practice in Gujarat. Because healers are such integral parts of their communities and so commonly sought out, collaboration between faith healers and medical practitioners would hold significant promise as a means to benefit patients. This partnership could improve access to care and decrease the burden of mental illness experienced by patients and their communities.

Subjects treated by both a doctor and a healer reported they overwhelmingly would recommend a doctor over a healer. Almost all who were treated with medication recognized an improvement in their condition. Many subjects felt that traditional healing can be beneficial and believed that patients should initially go to a healer for their problems. Many also felt that healers are not effective for mental illness or are dishonest and should not be used.

There are plenty of twists in the story. I have watched it twice and i hope netflix will not remove it soon as i kept it on my list to be rewatched and relive the happy moments again.

Healer is a very good drama. It is suspense, action, comedy and of course romance. The story is a modern twist to our typical superheroes. You would want a Healer in yor life after watching it. It is my first JCW drama (now i have wached 4 of his dramas!) he is perfect for the role. When he run on the roof with the OST playing is so good. His change of character from Healer to Park Bongsu is phenomenal. You can really see how good actor he is. His emotion can really be seen in his eyes, ahh those eyes! I can look at them forever. Am i the only one that notice his hands, he has huge hands that appear so strong! The cute, sweet romantic moments whenever he is with PMY, my golly i have been reliving it in my memory! PMY is also very good in this drama not a damsel in distress at all. I love that she can fight with the bad guys with Healer.
